

## High School Graduation Gains Equal Economic Success

If Maine increased its overall graduation rate to 90 percent, the economic benefits from these **2,600** additional graduates would likely include as much as

- **\$27 million** in increased annual earnings and **\$4.1 million** in annual state and local tax revenues;
- **200** new jobs and a **\$35 million** increase in the gross state product; and
- **\$56 million** in increased home sales and **\$3.4 million** in increased auto sales.<sup>1</sup>

## Progress Has Been Made, But Graduation Gaps Remain

**Despite Gains, Not All Students Are Graduating from High School at the Same Rates ...**

High School Graduation Rates by Race (Class of 2011)<sup>2</sup>

	All Students	White	Black	Hispanic	Asian	American Indian
ME	84%	84%	77%	87%	90%	82%
Nation (Avg.)	79%	85%	67%	71%	87%	64%

## ... and Even Fewer Are Graduating from College

Four-Year<sup>1</sup> College Graduation Rates<sup>3</sup>

	All Students	White	Black	Hispanic	Asian	American Indian
ME*	56%	57%	49%	59%	75%	28%
Nation*	56%	60%	38%	48%	68%	39%

<sup>1</sup>Due to data limitations for two-year institutions, particularly as they relate to students who transfer from their first institution, two-year college graduation rates have been omitted.

<sup>2</sup>Graduation within six years of entrance (Cohort from 2005 to 2011)

## Better Preparation Is Key for Success in College and a Career

### Literacy Is an Underlying Problem for Many Students

School Year (SY) 2010–11 National Assessment of Educational Progress (NAEP) Reading Scores for Maine Eighth Graders<sup>4</sup>

Insufficient or no data was reported for other subgroups

## Commitment Is Paying Off, But Struggling Schools Remain

About 10% of all high schools still produce 40%+ of the nation's dropouts. In these "dropout factories," 60% or fewer of freshmen are promoted to senior year on time. Nationally, students of color and Native students are nearly four times more likely than their white peers to be enrolled in a dropout factory.<sup>5</sup> **Improving these schools must remain a national priority.**

### Maine High Schools

Federally Reported High Schools <sup>6</sup>	109 (SY 2009-10)	110 (SY 2010-11)
Dropout Factories <sup>7</sup>	0 (3 yr avg. 2008-10)	0 (Class of 2011)

An additional 2 high schools in Maine had a promoting power between 60 and 70 percent in SY 2010–11.<sup>8</sup>

Nationally, the number of dropout factories decreased 12% (from 1,617 to 1,424).<sup>9</sup> The number of all high schools decreased less than 1% from SY 2009–10 to SY 2010–11.<sup>10</sup>

## States Are Strengthening Standards to Improve Preparedness

Maine, along with 45 states and the District of Columbia, has adopted a common, state-created set of world-class standards for college and career readiness in English language arts and math. The four remaining states have their own college- and career-ready standards.

## More Accurate Measures of Student Proficiency Are Needed

**Maine's Eighth-Grade Proficiency as Measured by State Test vs. the Nation's Report Card (NAEP) for SY 2011–12<sup>11</sup>**

Nationwide, the average gaps between state- and NAEP-reported **reading** and **math** scores are **40 percentage points** and **32 percentage points**, respectively.

## States Are Working to Create New and Better Assessments

Forty-two states participate in one of two consortia to develop Common Core State Standards–aligned next-generation assessments, which are scheduled to be administered during SY 2014–15. **Maine participates in the Smarter Balanced Assessment Consortium.**

## Excellent Teacher Training Is Critical to Increased Student Achievement

To promote higher levels of student achievement, 27 states have committed to educating and preparing better teachers and administrators through **teacher licensing, program accreditation, and effective data use policies.** **Maine has joined this coalition of states focusing on educator preparation and entry into the profession.**<sup>12</sup>

## Connecting Technology to Schools and Students

Having access to a broadband network—connectivity—is crucial to taking advantage of the world of technology and what it offers in the classroom. Maine does have a statewide broadband network for its schools.<sup>13</sup>

The use of technology lends flexibility to schools and classrooms. Maine does allow additional flexibility by permitting schools to use funding for instructional materials on digital resources.<sup>14</sup>

## The Next Frontier: Deepen and Personalize Learning

Today's modern economy requires more than basic content knowledge. Leading states are building an engaging and personalized education process to achieve deeper learning outcomes of core content knowledge, creative and critical thinking, and problem-solving skills.

The following schools in Maine are part of a deeper learning network and represent new approaches to prepare students, particularly those historically underserved, for college and a career: Blue Hill Harbor School (Blue Hill), Casco Bay High School (Portland).

To foster such learning, school districts like Colorado's Adams County School District 50, and even entire states, like New Hampshire and Oregon, permit students to advance their grade level based on mastery of content rather than on amount of time spent in the classroom.
